Rules concerning Husbandry.

Rules concerning Husbandry.

**W**hen you would Plant or Graft, consider where the wind bloweth, if it be in the South it is very good for that purpose, but if it be North or East, it is not good.

It is good to Plant or Graft generally the Moone increasing in these signes, *Taurus* or *Aquarius*, in the beginning of the Spring or latter end of Harvest.

Plant Trees for continuance, when the Moone is in *Taurus*, *Leo*, or *Aquarius*.

Cut Timber to have it found, in December or January in the wane of the Moone in *Aquarius* or *Pisces*.

Prune trees and pull off the moss in the moneth of Feb. Plash hedges, and Lop trees for Fewell, that the heads may the sooner grow again, when the Moone is in *Aries* or *Libra* and in her increase.

Set young Quicksets, from September till March:

Remove young trees in the last quart of the  $\zeta$ , when she is in  $\gamma$ ,  $\mu$ ,  $\nu$ , and in these moneths, September, November, February.

Set vines in February, March or September, specially the Moone in *Aries*, *Libra*, or *Scorpio*, in her increase.

Set Rose trees in the middle of February, the  $\gamma$  increasing.

Cut or prune trees in March, or April, the Moone in *Taurus*, *Virgo*, or *Capricornus*.

Gather fruit as Apples, Pears, and the like, at the full  $\gamma$  in the afternoone, the weather being fair and dry.

Cut downe Hay presently after the full of the Moone.

Dung ground to prevent weeds growing, the  $\gamma$  increasing.

Sow Carrot seeds about the end of February or the beginning of March, the Moone increasing. But for Onions and Leekes, the same moneth, at the wane of the  $\zeta$ .

Sow Cucumbers and Melons, in February, March, or June, in a hot and dry day.

Sow Parsly, Fennel, and Anniseed, in February or March, at the full of the Moone.

Flv, 1665.

Sow Marjoram, Violets, Timey, Rosemary and Lavender  
in February, March or April, in the increase of the moone.  
Sow Gilliflowers and Wall-flowers in March or April,  
in the old of the moone.

Sow Hyssop and Savory in March, when the Moone is old.

Sow double Marigolds in February or March, in the in-  
crease of the moone.

Sheare Sheepe at the increase of the moone.

The best time to Geld cattel the Moone being in *Aries*  
*Sagittarius* or *Capricorne*.

## Of Blood-letting, and some other Physicall

Observations.

**I**n Youth let blood from the *Umbilic* to the first *Stomach*, in  
Imperfect age, from the first *quartern* to the full. In *Older* years  
from the full to the last quarter. In *Oldage*, from the Last  
quartern to the Change.

But know, that under the Age of 14. and above the Age of  
70. it is no good to Bleed at all.

Again, in the *Conjuncture* or *Conjunction*, it is very dangerous to  
take any *Phisicke* at all, unless there be great need, and indeed  
necessity both no way: wherefore in such a case, the disease  
being desperate, the cure must be adventurous.

Take a Purgation when the *Moone* is in *Trine*, or *Quarte*  
aspect, with *Comus* decreasing in any of these three signs,  
*Cancer*, *Scorpio*, or *Bilces*, and is well be sure to watch the  
matter, because when a most *Blow*, in a most signe hath such  
an aspect, the *Humours* in the body are then stirred up and down,  
and so the *Veins* are urged out, wherefore in this case, it cannot be  
ambiguously interpreted by some thing that is *Extrusive*: and  
let this be done, whilst the *Moone* is either in *Scorpio*, *Libra*  
or *Cancer*.

Take a *Comus* that is new, make thoroughly, when the *Moone*  
is in *Aries*, *Taurus*, or *Capricorne*: and know that the aspect  
of the *Moone* with *Saturne*, or *Mars*, or the *Moone* in *Libra*  
ought to be observed in the ending of *Medicines*.

Finally, I necessarily urge no more these *Observations* are expe-  
dient; for it is evident, that the change of *Measures*, upon  
different *affairs* with greatly differing; and also other *affairs*.
